

E-6 Slide Film Processing

Prepare water at 100° F. You should have at least 32 ounces worth.

Make sure chemicals are heated to 100° as well.

All times include a 10-second drain time at the end of the step.

Step	Temperature	Time
Pre-wash	100.4° F	3 1/2 min.
First Developer	100.4° F +/- .5°	6 1/2 min.
Wash	100.4° F	1min.
Wash	100.4° F	1 min.
Reversal Bath	100.4° F	2 min.
Color Developer	100.4° F	4 min.
Conditioner/Pre-Bleach	68-104° F	2 min.
Bleach	92-104° F	6 min.
Fixer	92-104° F	3 min.
Wash	92-104° F	3 min.
Wash	92-104° F	3 min.
Final Rinse	room temperature	1 1/2 min.
Dry		

Remember: Processing Times and Temperatures are critical! You must be exact to get good results.
