

# FILM DEVELOPMENT

## I. DEVELOPER

Time: 4 1/2 minutes  
Agitation: Continuously for first 30 seconds; then, agitate 5 seconds every 30 seconds

*Pour down the drain*

## II. WASH

Time: 1 minute  
Agitation: None needed, but fill and drain tank continuously during the entire minute

*Pour down the drain*

## III. FIXER

Time: Check for clearing time, double that and add 10 seconds (clearing time is the length of time it takes to get a test piece of film to become see through when dropped in the fixer)

Agitation: 10 seconds at the beginning of each minute

***DO NOT DISCARD - IT IS ILLEGAL TO POUR FIXER DOWN THE DRAIN!***

*Pour back into fixer container*

## IV. WASH

Time: 1 minute  
Agitation: None needed, but fill and drain tank continuously during the entire minute

*Pour down the drain*

## V. PERMA WASH

Time: 1 minute  
Agitation: 10-15 seconds at the beginning the the minute

*Pour back into perma wash container*

## VI. WASH

Time: 1 minute  
Agitation: None needed, but fill and drain tank continuously during the entire minute

*Pour down the drain*

## VII. PHOTO FLO

Time: 30 seconds  
Agitation: Agitate continuously during entire 30 seconds

*Hang to dry under fan (no heat).*
