

PHOTO REVIEW

CROPPING

- Know how to crop a photo using both the Ultracropper and the Proportion Wheel.
- Know the grid for the proportion wheel (

	%	W	D
		R	
		O	

)
- Know what all those letters stand for and what each number corresponds to. (For example, how do you know how far apart to place the crop marks on your photo?)
- How many crop marks are necessary for the Ultracropper and the Wheel?
- What type of writing utensil is necessary to make crop marks?
- What is the maximum percentage you should enlarge a photo? Why?

PORTRAITS

- What lens length should you use and why?
- What time of day is best and why?
- How can you reduce red eye?
- What film speed is best for portraits?
- How can you help your subject relax?
- If the subject is back lit, how can you put light on the face?
- Know all the tricks for disguising physical flaws (baldness, noses...)
- Know where the camera height should be.
- What is the difference between diffused and direct lighting?

LENSES, F/STOPS AND SHUTTER SPEEDS

- Be sure you know all the aperture numbers and shutter speeds.
- How can you increase depth of field in a photo?
- How can you play with time lapse pictures?
- What does the ISO number mean on film?
- Know the differences between short and long lenses.
- How are lenses measured?

DESIGN AND LAYOUT

- Review all the commands in Pagemaker
- What are the rules about placing a dominant photograph on a spread?
- What unit of measurement is used in layout?
- What unit of measurement is used for type size?
- What is the center fold of a spread called?
- Why do we layout in columns?
- Where can copy be placed on a layout?

MISCELLANEOUS

- How do you get fingerprints off a photo?
- What does SLR mean?
- What is the rule of thirds?
- What is the correct way to hold a camera?
