planning

what feeling does black and white film give?

what feeling does color film give?

composition

Write a brief description of a movie you've seen

What techniques did the filmmaker use? (give five specific scene examples)

Shoot a roll of film that tells a brief story. Plan first what you are going to do

Vary the shots to long, medium and close-ups. Shoot 24 photos of the same event like a trip downtown, fixing something, family gathering, trying out a new hairstyle or here at school- an art project, a teacher's lesson, an event in the office or counselors, a day of practice

Write your plan here before you get your film
