

Non linear video editing

Transitions:

Make sure the transitions are showing if not WINDOW SHOW TRANSITIONS

Transitions are placed in Video 1A in the transition line.

The clips must be stair stepped between Video 2 and Video 1a for the transitions to work.

Pull the transition to cover a couple of seconds of the clip.

Extend the blue bar across the transition then, PROJECT PREVIEW to render the change.

Titles:

FILE NEW TITLE

To select a background color TITLE TITLE WINDOW OPTIONS click on the background color square. Choose the color you want OK. Choose opaque to get a solid color, deselect opaque if you want to lay the title over video.

Choose the text tool T. Click in the title space and type.

Click once with the mouse when finished, then you can move the title to any spot on the title window.

FILE SAVE AS....

FILE IMPORT FILE to get the title page into the video.

Drop the title just as you did a clip anywhere in the timeline.

Pull the title to the desire length of time.

PROJECT PREVIEW to render the change. (Don't forget to pull the blue bar.)

Video Capture:

Que up the video in the deck.

Turn on the Mackie mixer. 1 and 2 up, 3 and 4 down. You will not hear the sound.

FILE CAPTURE MOVIE CAPTURE

A blue movie capture window appears. Hit play on the deck and record in the movie capture window. Let the video play to the desired point then click the mouse.
FILE SAVE AS... (in the correct period folder) name your clip.

Make sure you save after each clip is made. Premiere does not like a lot of random unsaved clips hanging around.

Import the clips into a timeline when finished cutting the video.

Audio Capture:

Put the CD in the computer.
Minimize all windows.
Pull up the CD player under the Apple.
FILE CAPTURE AUDIO CAPTURE

AUDIO CAPTURE SOUND INPUT choose built in NOT Media 100.

An audio capture window will appear. The level line should NOT be all the way up. If it is check the AUDIO CAPTURE SOUND INPUT again.

Place the audio capture window next to the CD player.

Select the track of the CD player. Play then hit Record in the audio capture window. The level line should move.

Click stop in the audio capture window when finished.

FILE SAVE AS... (to the correct period folder) your name.

FILE IMPORT FILE and place the audio in the timeline.
