

# Exam: Fall Semester Digital Photography

1. Open PhotoShop.
2. Create a new document that is 5X7 with a resolution of 125.
3. Open the image named "Fruit" inside the sample folder.
4. Cut and paste an apple from the "Fruit" image to the new document.
5. Open the "Frame" image inside the sample folder.
6. Cut and paste the frame from the "Frame" image to the new document.
7. Erase the center of the frame where the hand is, or fill the area with another color.
8. Position the apple in the center of the frame. Transform the size of the apple as necessary so that the apple will sit in the center of the frame.
9. Open the "Leaf" image that is in the sample folder.
10. Cut and paste the leaf into the new document.
11. Position the leaf anywhere on the document that you would like.
12. Clone the leaf at least one time.
13. Add red text to the new document page.
14. Save the image to the hard drive in the appropriate class folder with your name.

For extra credit: rotate one of the leaves you created.
