Non-Linear Video Editing
Using Adobe Premiere

Video Capture:

 Queue up the video on the deck
Turn on the Mackie mixer 1&2 (media 100) muted (down), while 3&4 (VCR) are unmated (up)

FILE CPTURE MOVIE CAPTURE
A movie capture dialogue box appears, Hit play on the VCR and click RECORD in the dialogue box. Let the movie play for aprox. 10-30 seconds. Click the mouse to stop recording. FILE SAVE AS… Save the clip to the correct class period folder on the video drive.

Make sure you save each clip you have created then close that clip.

FILE IMPORT FILE the clips into the Project Window, or click and drag the clip to the Project Window.

Drag the clips from the Project Window to the video track in the Timeline Window. Arrange the clips in the desired order.

Used the Razor tool or EDIT RAZOR AT EDIT LINE to cut the video.

Audio Capture:

Place a CD in the computer
Minimize all windows
Go to the APPLE and choose the CD Player.
FILE CAPTURE AUDIO CAPTURE

AUDIO CAPTURE SOUND IMPUT from the source choose BUILT IN not Media 100.
An audio capture window will appear. The level line should not be all the way up. If it is check the Sound IMPUT and choose built in.
Place the audio capture window next to the CD player.
Select the desired track, and double click RECORD on the Audio Capture window.
The level line will now move. You will not hear the music.

Click STOP when finished.

FILE SAVE AS… save your music to the correct class period folder.

FILE IMPORT FILE and import the music clip into the Project Window.
Drag the music clip to one of the audio track lines in the Timeline Window.

Titles:

FILE NEW TITLE
To select a background color WINDOW TITLE WINDOW OPTIONS.
Click on the background color square. Choose the color you want then choose OK. Choose opaque to get a solid color, deselect opaque if you want to lay the title on top of a piece of video. (If you want a translucent title the background color you choose must be bright green.)

Choose the Text Tool (T). Click in the title window and type. Be sure to stay within the double lines.
Click the mouse to stop typing. Now you can move the title to the desired position. Highlight the title to change the font and size.

FILE SAVE AS… save the title to the class period folder.

FILE IMPORT FILE to import the title to the Project Window. Or click and drag the title to the Project Window.

Drag the title to the Timeline Window. Place the title in the video track. If the title is translucent place the title in video 2 on top of the desired piece of video.

Stretch the title to the desired length of time.

Drag the blue line in the Timeline Window across the title and video, PROJECT PREVIEW. The title will now appear in your video.

Transitions:

Make sure the transitions are showing if they are not showing WINDOW SHOW TRANSITIONS.

Transitions are placed in Video 1 track in the Transition Line. The 2 clips that the transition will go between must be "stair stepped" between Video 1a and Video 1b.

Pull the transition so it will cover a couple of seconds of each clip.

Extend the blue line in the Timeline Window across the transition then PROJECT PREVIEW. This will allow the transition to take effect.
