All images should be in JPEG format, saved at maximum quality, with a maximum dimension (width or height) of 2500 pixels. Do not wait until the last minute to upload entries!

* **Digitally constructed single images** means that images have been constructed by use of computer software, including HDR images. These images must have photographic elements (such as originally from a digital camera, film image, scanned materials, still-video frame, etc.); entries that are composed solely of graphic-arts elements are not eligible. All components of the entry must be the original work of the student. The **Portfolio** category is a five-image (5) portfolio. These entries count as a single entry. The **Photo Story** category should include 5 images and a full caption must be included in the metadata for each photograph.
